Projects

Helping Hand, 2021 | Heroku
MERN-stack application

● Served as project manager on a team of four engineers to create user stories, wireframes, and ERDs

● Built application using React, MongoDB, Express and Node in a one-week sprint

● Deployed API and client applications using Heroku and MongoDB Atlas

Primal Recipes Collector, 2021 | Heroku | GitHub
FULL-stack application using Node, Express, and PostgreSQL

● Developed full-stack application independently, from wireframes to MVP

● Implemented authorization using bcrypt, Express sessions, and Passport

● Planned future updates for later implementation, and organized code and SQL database to facilitate future updates

● Deployed application using Heroku

Supermarket Shopping Game, 2021 | GitHub
Front-end game using HTML5, CSS, and JavaScript

● Designed game independently from initial concept and wireframing to MVP
● Built playable game using Javascript, HTML, and CSS in a one-week sprint

Experience

Software Engineering Apprentice, General Assembly - *Remote, Oct 2021 - Present, January 2022 Completion*
